

healthcare technology solutions for the global EMS market

## The SNB Experience

**Patient data for hospitals, clinics, & other healthcare facilities**

Only display patients destined for the receiving facility.

**Advanced hospital alerts**

Audible and visual alerts notify hospital staff of incoming patient(s)

**View inbound patient information**

Quick reference view to over 50 data points including vitals, times, complaint/impression, and demographics.

**View attachments**

Quick access to ePCR attachments such as ECGs, scene photos, incident reports.

**Reduce offload times**

Pre-admit and prepare for patient arrival.

**Care transfer compliance dashboard**

Real-time metrics and notification to hospital receiving teams.

**Search historical ePCRs**

Retrieve historical ePCR data when needed.

**Redirect patient for appropriate care**

Advanced notice allows ED staff to redirect EMS to specialty or alternate care facilities.

## Real-time alerting and sharing of inbound emergency calls

**Siren Notification Board (SNB)** is a simple, secure, web-based solution that alerts a hospital in real-time of incoming patients from medics charting in the field. As part of Siren ePCR suite, SNB's customizable layouts and color-coding options provide visual indication of condition and/or priority of inbound patients.

SNB helps to address the issues all hospitals and EMS providers face with access to ePCRs both in real-time and after care, as well as care transfer metrics. With **automatic** data updates at pre-defined intervals, teams can prepare for and pre-admit an **inbound patient** before hospital arrival.

Hospital/ER staff receive critical information in real time = better patient care and decision making

ePCR access improves compliance, safety, and information

Category	Unit Name	Unit Status	Unit Location	Unit Type	Unit Priority	Unit Status	Unit Status	Unit Status
Emergency	Unit 1	Online	1234567890	Unit 1	Unit 1	Unit 1	Unit 1	Unit 1
Emergency	Unit 2	Online	1234567890	Unit 2	Unit 2	Unit 2	Unit 2	Unit 2
Emergency	Unit 3	Online	1234567890	Unit 3	Unit 3	Unit 3	Unit 3	Unit 3

*"We have situational awareness of incoming ambulances so nurses can prepare for disposition of patient on arrival, and better alignment of transfer of care times between the medic and nurse which is entered into the ePCR."*

## Committed to improving patient outcomes.

We innovate ePCR features to improve patient outcomes.

Chart in real time at the touch of a button. Create accurate ePCRs quickly with Siren's features like patient lookup and ePCR transfer.

EMS does not end in the emergency room. Siren integrates with other systems to help provide all health care professionals with a holistic view of the patient's care.

With over 25K data elements and a suite of tools, dive into patient care reports like no other software on the market.

## Committed to your operational success.

We help you select, implement, and integrate the right Siren ePCR solution for your agency.

We train your team to get the most benefit from Siren, drive user adoption, and produce meaningful and valuable data to your organization.

We focus on a successful and seamless launch of ePCR to your agency, and provide **24/7/365** support by our North American-based service team.

Medusa Medical Technologies has delivered quality ePCR software and deployment services for almost **20** years to the **global pre-hospital** market.

From **4 to 1,000** vehicle operations, we have implemented Siren ePCR in different languages all over the world. Our users generate millions of records every year. We are in **9** countries...and counting.

We offer managed (hosted) or enterprise options to both private and public organizations. Our flexible framework addresses your agency's unique challenges including client resource availability, product customization, aggressive timelines, diverse geographic challenges, and data collection requirements.

Our **Siren ePCR solution** consists of a comprehensive and configurable set of software modules that help deliver quality and timely patient care. Modules include Siren **Field User**, Siren **Notification Board**, and Siren **Data Analytics**.

## Features of Siren ePCR Suite

- Capture and share clinical data in real-time
- Easy and accurate finger-friendly charting
- Data encryption in transit and at rest
- Document with or without connectivity
- Direct access to medical protocols
- Configurable administrative workflow
- Export to billing, regulatory, insurance systems
- Administrative ePCR transfer to EMS crew
- Assign, edit, and view ePCR history
- Real-time data feed to hospital staff
- Hospital care transfer compliance dashboard
- Reduce handover and wait times
- Hospital access to historical patient ePCRs
- Multi-agency/language capabilities
- Integrate to RMS, eHR, CAD, medical device
- BI agnostic data warehouse
- Powerful and meaningful data analytics
- Ad hoc, dashboard, scorecard, KPI reporting

*“Siren Notification Board is a huge benefit to patients, emergency department staff, and EMS. It has provided creative solutions to our problems and has elevated our team above and beyond the minimum standards in our relationships with the hospitals we serve.”*
